Education

Federal Institute of São Paulo

Bachelor of Control and Automation Engineering

Jan. 2019 – Dec. 2023

São José dos Campos, Brazil

Relevant Coursework

- Web Development
- React & Next.js
- TypeScript & JavaScript
- REST API Design
- Database Design (SQL/NoSQL)
- Version Control (Git)
- CI/CD Pipelines
- Cloud & VPS Deployment
- AI Integration

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SSR/SSG, REST API consumption

Backend & Databases: Node.js, Python, REST API design, MongoDB, SQL, PostgreSQL, WebSockets

DevOps & Tools: Git, GitHub, GitHub Actions (CI/CD), Docker, Vercel, VPS/Linux, Raspberry Pi

AI & Productivity: OpenAI API integration, GitHub Copilot, AI-powered features in web apps

Workflow: Agile (Scrum/Kanban), Jira, technical documentation, version control best practices

Experience

Movewertech Technologies (Startup)

Jun. 2025 – Present

Founder & Full-Stack Developer

Braga, Portugal

- Designed and built a **full-stack web platform** using **Next.js, TypeScript and React**, with server-side rendering, dynamic dashboards and real-time data visualization.
- Developed a **RESTful API backend** in Python, handling data ingestion from IoT sensors and delivering AI-generated insights to the frontend.
- Containerized the entire application with **Docker**, deployed on a **VPS** with **CI/CD via GitHub Actions** and production frontend hosted on **Vercel**.
- Managed the complete product lifecycle: architecture, development, testing, deployment and iteration – solo and end-to-end.

Psyche AeroSpace (Startup)

Jun. 2024 – Jun. 2025

Engineering Team Lead

São Paulo, Brazil

- Led a cross-functional team of 5 engineers, managing technical roadmaps and delivery using **Scrum and Kanban** on Jira.
- Drove technical decisions that contributed directly to new fundraising rounds, demonstrating the ability to translate engineering work into business value.

Projects

MOV Platform | *Next.js, TypeScript, Python, REST API, InfluxDB, Docker, Vercel*

Jan. 2026

- Full-stack IoT monitoring platform with a **Next.js** frontend, Python REST API, real-time data pipeline and AI-powered insights. Containerized with **Docker** and self-hosted on a VPS. 0xfelipegd.github.io

Next.js Web App | *Next.js, TypeScript, React, NextAuth, MongoDB, Vercel*

Dec. 2025

- Full-stack web application with **SSR, API routes, JWT authentication** via NextAuth, **MongoDB** database and production deployment on Vercel with CI/CD via GitHub. 0xfelipegd.github.io

FIFA World Cup 2030 Simulator | *JavaScript, HTML5, CSS3*

Sep. 2025

- Interactive browser-based app with dynamic bracket rendering, match simulation logic and responsive UI – built with vanilla **JavaScript, HTML5 and CSS3**. 0xfelipegd.github.io

About Me

Dual-Track Professional: Software Developer & Automation Engineer

- Pursuing parallel careers as a **Full-Stack Developer** and an **Industrial Automation & Mobile Robotics Engineer** – combining software craftsmanship with deep systems engineering expertise.
- Engineering background gives me a strong ability to break down complex problems, write reliable code and ship products that actually work in production.
- Founder of **Movewertech Technologies** – building real software and hardware products at the intersection of web, IoT and mobile robotics, with a focus on clean architecture and continuous delivery.
